

CA ENERGY 

The **BESIPPPP** **Bid Window 3** in Review

Unlocking South Africa's Energy Future

The **Battery Energy Storage
IPP Power Programme**
(BESIPPPP) is transforming
South Africa's energy
landscape.

*Learn how CA Energy supports
this transition.*

Why is BESIPPPP a Game-Changer?

The 3rd bid round of BESIPPPP aims to procure **616 MW** of battery energy storage capacity, advancing:

- Grid stability
- Renewable energy integration
- Economic development

Key Programme Highlights

- Battery storage capacity: 123–124 MW per project for 4 hours
- Round-trip efficiency: Minimum 70%
- Annual availability: At least 95%

These strict requirements ensure reliability and sustainability.

The Importance of Energy Storage

- Balances supply and demand
- Mitigates load shedding
- Improves grid resilience
- Bridges the gap between energy generation and consumption

Opportunities for Energy Professionals

The BESIPPPP opens
doors for:

- Renewable energy engineers
- Regulatory compliance experts
- Project managers
- Legal and financial consultants

At CA Energy, we connect skilled professionals with these exciting opportunities.

CA Energy's Role in BESIPPPP

- Partner with industry leaders
- Promote local talent
- Facilitate collaboration between global and local experts
- Support economic development

Together, we're driving Africa's energy transformation.

Let's Power the Energy Transition

Partner with us for renewable
energy recruitment solutions.
